SUBJECT: Kurfees Coatings - A. L. Taylor Site

On September 22, 1980, I called Mr. Carroll Lang concerning the status of the materials removed from the Valley of the Drums (see attached letter).

He informed me all drums and materials that were removed have yet to be addressed and they are presently being stored in an isolated area at the plant.

Mr. Lang informed me:

1. This is presently a "slow period" for Kurfees business, and by mid-November the plant will be gearing up towards increased productivity. It is at this time that the resins removed from the Valley will be incorporated into the manufacutring process.
2. The remaining two (2) drums of trash will be transferred to new drums and handled appropriately.
3. A letter formally addressing these materials will be written.
